

United States

Rights Dimension (R1–R10)

Measures how strongly the framework protects individuals from AI harms. Max raw score: 20.

Code	Indicator & Justification	Score
R1	Binding comprehensive AI law with individual rights provisions No federal AI law. Colorado SB 205 (effective July 1, 2026) creates binding obligations for high-risk AI systems, requiring transparency, risk assessments, and user notification for consequential automated decisions. Illinois BIPA has been the most-enforced AI-related binding law in the U.S. with over USD 1.6 billion in settlements. Score 1 — binding law exists at state level only, not comprehensive federal law.	Score 1 — Soft / partial / sector-specific
R2	Explicit list of prohibited AI use categories in binding law Several state laws create de facto prohibited uses: Illinois BIPA prohibits unconsented biometric data collection; Colorado SB 205 prohibits discriminatory automated decisions in certain contexts. No federal prohibited use list. Score 1.	Score 1 — Soft / partial / sector-specific
R3	Legal right to explanation for automated AI decisions Colorado SB 205 and New York City Local Law 144 require meaningful transparency about automated employment decisions. No federal right to explanation. Score 1.	Score 1 — Soft / partial / sector-specific
R4	Legal right to human review of AI decisions Colorado SB 205 requires deployers of high-risk AI to provide consumers the ability to appeal consequential decisions and access human review. State-level only. Score 1.	Score 1 — Soft / partial / sector-specific
R5	Legal right to contest or appeal AI-driven decisions Colorado SB 205 provides a right to appeal automated decisions and receive correction of errors. State-level only. Score 1.	Score 1 — Soft / partial / sector-specific

R6	Anti-discrimination provisions specifically targeting AI EEOC has issued guidance applying existing Title VII anti-discrimination law to AI hiring tools. No federal AI-specific anti-discrimination law. Score 1 — general law with agency guidance applied to AI.	Score 1 — Soft / partial / sector-specific
R7	Independent enforcement body acting on behalf of individuals FTC, EEOC, and CFPB have each taken enforcement actions touching AI under existing law. No AI-specific federal enforcement body. Score 1.	Score 1 — Soft / partial / sector-specific
R8	Meaningful financial penalties calibrated to harm or global turnover State-level penalties under Colorado SB 205 reach up to USD 20,000 per violation enforced by the Colorado AG. Illinois BIPA class action settlements have exceeded USD 1.6 billion. No federal AI-specific financial penalty. Score 1.	Score 1 — Soft / partial / sector-specific
R9	Restrictions on biometric surveillance or invasive AI in binding law Illinois BIPA creates binding restrictions on biometric data collection and use. Several states have passed biometric privacy laws. No federal biometric AI restriction law. Score 1.	Score 1 — Soft / partial / sector-specific
R10	Constitutional or treaty-level AI rights protection No constitutional or treaty-level AI rights protection. Score 0.	Score 0 — Absent

Market Dimension (M1–M10)

Measures how strongly governance relies on voluntary, industry-led mechanisms. Max raw score: 20.

Code	Indicator & Justification	Score
M1	Primary governance mechanism is voluntary, not legally binding Federal governance is primarily voluntary (NIST AI RMF). Colorado and Illinois have created binding state-level requirements. The coexistence of federal voluntary and state binding creates a mixed picture. Score 1.	Score 1 — Soft / partial / sector-specific

M2	Industry self-governance is the primary compliance mechanism The NIST AI RMF is entirely industry self-assessed with no external verification requirement. The AI Action Plan (July 2025) positions industry self-governance as the preferred compliance model. Score 2.	Score 2 — Binding / comprehensive
M3	Innovation promotion explicitly mandated in governance framework AI Action Plan (July 2025) emphasises AI competitiveness as a national security interest. EO 14179 explicitly removed AI safety obligations constraining innovation. Score 1.	Score 1 — Soft / partial / sector-specific
M4	No binding financial penalties exist for AI violations No federal AI-specific financial penalties. State-level penalties exist. Score 1.	Score 1 — Soft / partial / sector-specific
M5	Formal regulatory sandbox or experimental zone for AI NIST has proposed regulatory sandbox concepts. Financial sector regulators have informal sandbox arrangements. No comprehensive federal AI regulatory sandbox law. Score 1.	Score 1 — Soft / partial / sector-specific
M6	Framework is principles-based rather than prescriptive-rules-based NIST AI RMF is built around four functions (GOVERN, MAP, MEASURE, MANAGE) as high-level principles. Federal AI policy explicitly avoids sector-specific mandates. Score 2.	Score 2 — Binding / comprehensive
M7	No dedicated enforcement body with AI sanctioning powers No federal AI-specific regulator. FTC, EEOC, CFPB act under existing law. Score 1.	Score 1 — Soft / partial / sector-specific
M8	Compliance is primarily self-assessed, not externally audited NIST AI RMF is entirely voluntary and self-assessed. No external verification, audit, or certification required under any federal law. Score 2.	Score 2 — Binding / comprehensive

M9	Explicit alignment with international voluntary standards (OECD, ISO 42001) U.S. endorsed OECD AI Principles in 2019. However, the 2025 NIST AI RMF revision removed references to misinformation, DEI, and climate change, diverging from the broader scope of the OECD principles. Score 1.	Score 1 — Soft / partial / sector-specific
M10	Light-touch, pro-industry approach explicitly stated in official policy AI Action Plan (July 2025) explicitly frames U.S. AI governance as enabling competitiveness against China. EO 14179 revoked Biden's AI safety executive order. Score 2.	Score 2 — Binding / comprehensive

Sovereign Dimension (S1–S10)

Measures how strongly the state directs and controls AI development and deployment. Max raw score: 20.

Code	Indicator & Justification	Score
S1	AI outputs must comply with state values or ideology in binding law No requirement for AI content to comply with state values or ideology. First Amendment protections apply. Score 0.	Score 0 — Absent
S2	Mandatory state registration required before AI deployment No mandatory federal registration before AI deployment. Score 0.	Score 0 — Absent
S3	National security provisions give state broad AI override powers National security AI systems are exempt from most governance frameworks. Executive orders grant broad national security AI authorities. Score 1.	Score 1 — Soft / partial / sector-specific
S4	State directs AI development priorities through binding strategic mandate AI Action Plan (July 2025) frames AI as a geopolitical tool and sets strategic national AI development priorities through executive policy. Score 1 — direction through executive action, not legislation.	Score 1 — Soft / partial / sector-specific
S5	Data localization requirements affecting AI training or deployment No federal data localization requirements. The U.S. opposes data localization internationally. Score 0.	Score 0 — Absent

S6	Restrictions on foreign AI providers or models in binding law	Score 1 — Soft / partial / sector-specific
	Export control rules restrict American AI chips and models from reaching adversary nations. Commerce Department Diffusion Rules regulate AI model exports based on compute thresholds. Score 1.	
S7	State ownership or investment explicitly directs AI development	Score 1 — Soft / partial / sector-specific
	CHIPS and Science Act provides USD 52 billion for semiconductor manufacturing. NSF AI research investment programmes direct federal funding toward AI. Score 1.	
S8	State surveillance AI explicitly authorized or mandated in law	Score 1 — Soft / partial / sector-specific
	Government surveillance AI operates under general intelligence authorities, not AI-specific statutory authorisation. Score 1.	
S9	Content moderation requirements serving state political interests	Score 0 — Absent
	No federal content moderation requirements serving political interests. First Amendment restricts state content control. Score 0.	
S10	State pre-approval required for AI deployment	Score 0 — Absent
	No federal pre-approval requirement for AI deployment. Score 0.	

Derived Coordinates

Ternary coordinates (r, m, s) are computed directly from the raw indicator sums. The compass rx coordinate is derived as $(r - s) \times 1.15$, capped at $[-1, +1]$. Bind score reflects enforcement strength independently of the ternary position.

Rights (R)	9	20	r = 0.32
Market (M)	14	20	m = 0.50
Sovereign (S)	5	20	s = 0.18
Total	28	60	Enforcement (bind): 35%

$$r = 9 \div 28 = 0.32 \quad m = 14 \div 28 = 0.50 \quad s = 1.00 - 0.32 - 0.50 = 0.18$$
